OUR TRUST

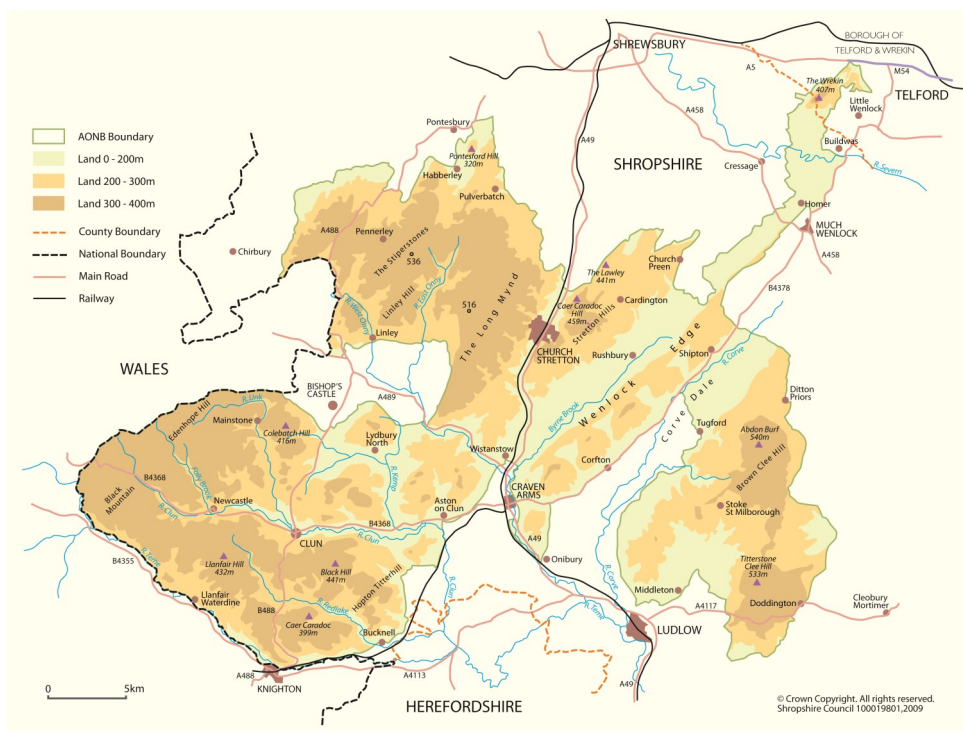

The Shropshire Hills National Landscape (a designated Area of Outstanding Natural Beauty) is a landscape of equivalent importance to a National Park.

Covering a quarter of the county, its hills, woods, rivers and farmland support a huge variety of wildlife, are rich in heritage, and provide a wide range of ecosystem services vital to us all.

The Shropshire Hills Landscape Trust is a Charitable Incorporated Organisation dedicated to ensuring these special qualities – many of which are under serious threat – are secured forever.

Through our Conservation Fund grant scheme and other projects we enable practical initiatives that make a real difference to local habitats, landscapes and communities.

Volunteer management, sponsorship-in-kind and administrative support from the Shropshire Council-hosted National Landscape Team ensures 99% of Supporter funding goes directly to projects that protect and enhance the Hills we love.

OUR WORK

The Conservation Fund

In recent years our core small grant scheme has helped over 50 community groups across the Shropshire Hills deliver 70 conservation projects involving more than 1000 people. Each year our seed funding delivers more than two and a half times its value in additional income and volunteering time – often very much more.

The projects our carefully-structured application and approval system supports:

- Deliver effective, locally-led wildlife, heritage and landscape conservation;
- Bring communities together in supportive networks with a shared sense of purpose;
- Engage a wide range of young people and groups in worthwhile volunteering;
- Build valuable nature recovery knowledge, skills and enthusiasm across the Area;
- Kickstart activities which frequently multiply into much more ambitious initiatives.

Fix the Fort Appeal

We are also addressing serious erosion on the Iron Age hillfort that crowns the iconic Caer Caradoc with a high-profile appeal to fund contractors and volunteers to repair its ramparts and harden paths against further damage.

Shuttle Bus Supporters' Scheme

Our scheme helps keep the weekend shuttle bus running across the Long Mynd and Stiperstones through the summer, allowing people to enjoy the area in a climate-friendly way and reducing the burden of traffic on roads and popular locations.

Project Volunteering

We signpost volunteers to a range of tree-planting, river improvement, wildlife monitoring, habitat management and heritage support projects undertaken by the National Landscape team and its partners – including Shropshire Wildlife Trust, Woodland Trust,

National Trust, Caring for God's Acre, Butterfly Conservation and the Shropshire Ornithological Society.

SUPPORTING US

Our Supporters scheme is the easiest way for businesses, organisations and local Councils to help our special Hills.

It complements the Friends of the Shropshire Hills scheme through which individuals and families support our work.

For an annual charitable donation of £250 our Supporters receive:

- The right to display our distinctive Shropshire Hills Supporter logo on business materials and premises.
- Their logos on our website pages and widely-circulated annual Conservation Fund report.
- Recognition in our programme of press, digital and social media communication throughout the county and beyond.
- Participation in our annual event to celebrate activities and achievements with community groups, Friends and other partners and supporters.
- Strong identification with active conservation work addressing vital concerns about the natural world and climate change.
- The opportunity to become involved in specific Shropshire Hills projects offering wider corporate and social responsibility benefits and recognition.

GETTING IN TOUCH

Please contact us if you are interested in supporting the Shropshire Hills by joining our business network or exploring any other sponsorship opportunities.

As a Supporter, one of our Trustees would be more than happy to visit you at any time to discuss how best we can match our specific activities to your particular needs in the most productive and tax-efficient ways.
